Abstract	<p>Drugs are an important component of health services that are the needs of the community. There is still a lack of community knowledge of medicines and management especially for family members, hence an educational effort as well as improvement of quality of drug management in family through training program and mentoring by pharmacist. This community service activity aims to determine the knowledge and attitude of the community in managing drugs in the family and improve the quality of drug management by the community in the family. The activity was conducted in Sidasari Wetan Kubangkungkung Village Kawunganten Cilacap. The workshop on drug management in family was conducted by pharmacist to the 33 participants. Data collection was done by using questionnaire and observation through home visit. The result of the activity shows that the increase of knowledge and attitude of the society in managing drugs in the family were 10% and 7%, respectively. Workshop activities and mentoring by pharmacists can provide benefits and behavioral changes in family drug management.</p>
