Abstract	<p>The objectives of the study are as follows: (1) to analyze the entrepreneurship competence level of dairy farmers, (2) to find out factors that influence the entrepreneurship competence, and (3) to formulize a model of extension service for dairy farmers to improve their entrepreneurship competence level. The research study was conducted at Bandung Regency West Java. The respondents were 151 dairy farmers selected randomly; and the data collected using questionnaires and observation. The number of sample was determined based on Slovin's formula. Statistical analyses used were correlation, regression and path analysis. The major findings of the study are that the entrepreneurship competence levels of the dairy farmers at the medium category. Factors that influence the entrepreneurship competence of the farmers are their education background and the number of family members, lacking of facilities, informations, and the policy of the government. Extension strategies for the entrepreneurship competence improvement are through strengthening of non formal education, and more involvement of family members in daily activities, improvement of daily facilities, informations and strengthening government support.</p>
