Abstract	Stakeholders are the main actors of development that determine process, result, implementation and evaluation of Development Planning Forum (Musrenbang). This study was aimed to analyze the characteristics of stakeholder relations, aspirations and access to information media with the intensity of stakeholders communication in Musrenbang at the village and urban village level. The study used the sequential mixed methods, that were descriptive analysis, for qualitative method, and explanative quantitative survey methods by employing Pearson corelational analysis. Quantitative data were collected through questionnaires with cluster sampling, Solvin formula, and then stratified sampling. While the qualitative data were collected through literature review, direct observation, analysis of documents, and also interviews. The research took place in Balokang Village, Rejasari Village, Mekarsari Urban village, and Muktisari Urban village in Banjar, West Java. The results showed: the characteristic of stakeholders, aspirations, and access to information media have significant correlation with the intensity of stakeholders' communication in Musrenbang at the village and urban village level.
