<b>Abstract</b>	Cocoa plants is the regional superior commodity in Nglanggeran, Pathuk District, Gunung Kidul Regency. This cocoa cultivation is integrated with Etawa goat and made as Agricultural Technology Park which intended to increase the income of farmers in Nglanggeran since not only to buy a cocoa, but also to teach farmers how to cultivate cocoa properly. This research aims to know 1) the income of cocoa farming and 2) the contribution of cocoa farming income to the household income of farmers in Nglanggeran. This research used a descriptive method of analysis with simple random sampling method. Data collection techniques used was interview and observation. Income analysis, R/C ratio analysis and income contribution analysis were applied to analyze the data. The results of the cocoa farming income analysis in Nglanggeran amounted to Rp. 4,387,000 with a profit value of Rp. 2,537,000. The contribution of cocoa farming is 16.90% of the total household income and classified as low category.
