Abstract	The purpose of this study is to examine how the parent's understanding of the dangers of the internet, how the pattern of internet parenting style of children's Internet usage, how the pattern and experience of children in using the internet, and the child's perception of the pattern of internet parenting style. The research used qualitative description method, the data was collected by purposive sampling from 37 parents and 37 teenagers aged 12-19 in Purwokerto by using structured interview. The results of the study (1) parents have an understanding of internet risks, though not all then do the protection measures; (2) the four dimensions of internet parenting style patterns namely mediation, introduction, restriction and covieing. Of the four dimensions it reinforces the previous review of parental supervisory patterns namely authoritative and permissive; (3) the majority of teenage informants have used the internet since primary school, are active in the use of social media, the majority are classified as heavy users, and some of them have experience related to internet risk, children tend to agree on parental supervisory forms in internet usage but still want the existence freedom or disapproval of authoritarian supervisory patterns.
