Abstract	<p>This study examined the accountability of the management of school operational assistance Funds (BOS) at MTs Ma'arif NU 1 Jatilawang Banyumas Regency in 2019/2020. This study aims to determine vertical accountability and horizontal accountability in the management of school operational assistance Funds at MTs Ma'arif NU 1 Jatilawang. The research was carried out using qualitative descriptive research that involves researchers in continuous and continuous experience with participants. Qualitative research is a research approach that tries to reveal specific meaning from each subject's point of view subjectively and aim to explore the deepest meaning of the subject about a phenomena. The development of qualitative research as a research method in the context to problems regarding social, cultural, and human behavior phenomena (Ahyar et al., 2020). In qualitative research, the researcher becomes the main instrument in collecting and interpreting the data obtained in the field. The results of the study indicate that every madrasah has almost the same problems regarding financial accountability to the public, but the pattern of implementing the accountability system still needs to be improved, both vertical and horizontally. The role of madrasah in the context of accountability must be carried out formaterials for improving the accountability system that ensures the implementation of back to back madrasah governance.</p>
