

## Genetic counselling

<b>Title</b>	Genetic counselling
<b>Author Order</b>	1 of 1
<b>Accreditation</b>	
<b>Abstract</b>	<p>Genetic counselling is a relatively new medical activity. There are some conditions that usually need genetic counselling. The classification of genetic disorders, their mode of inheritance and the method of establishing the diagnosis must be well understood before giving the counselling. The mode of inheritance of genetic disorders and some difficulties in the diagnosis need special attention. Chromosomal disorders and embryopathies have been shortly explained, as well. Finally, a short explanation of prenatal diagnosis, carrier detection and some methods of treating genetic disorders have been proposed so that genetic counselling can be given effectively. Key Words: genetic counselling - genetic disorders - genetic disorders - prenatal diagnosis - carrier detection.</p>
