<b>Abstract</b>	<p>Prevention and eradication of corruption case are the strategy which can be implemented separately it should be done synergistically, integrated and concurrently to prevent a new corruptor generation and other new corruptor. So the problem comes on how the strategy which are prevention and eradication corruption by Indonesian government to reach Indonesia free from corruption and what the obstacles in order to reach strategy prevention and eradication of corruption that already done by Indonesian government. This research used empirical juridical method with descriptive analysis, qualitative descriptive and content analysis. By this research can be known that government already had preventive and solutive corruption strategy to solve corruption, but there is still be found obstacles such as overlapping, weak supervision among institution, profession that related with law enforcemen and not maximal enough witness and informl protection. <b>Keyworld</b> : corruption, prevention, optimalization.</p>
