Abstract	Development Planning Deliberation (Musrenbang) is the participatory development process, involving stakeholders to perform the development communication functions in determining and realizing common welfare. This research used descriptive of qualitative method, data collection through literature review, direct observation, documentation analysis, and interviews. Research locations were conducted in Banjar, West Java Province by using purposive sampling. Research informants consisted of village head, facilitator, bureaucratic regional organization and stakeholders as participants of Musrenbang. The results showed that the implementation of Musrenbang was still less to utilize information media which should be given by government to the public or the community, either conventional media, such as announcement media in the village or by used the media of Information and Communication Technology (ICT), such as access of internet network to provide and maintain website at the village level in order to realize the development program which are informative, participatory, collaborative, transparent and accountable.
