

Favorable pathway of O₂ dissociative adsorption on a single platinum adatom coated on gamma-alumina (111) surface: a density functional theory study

Title	Favorable pathway of O ₂ dissociative adsorption on a single platinum adatom coated on gamma-alumina (111) surface: a density functional theory study
Abstract	
Authors	WT Cahyanto, F Oemry, AAB Padama, M Sakaue, R Belkada, SM Aspera, ...
Journal Name	Japanese Journal of Applied Physics 50 (10R), 105602, 2011
Publish Year	2011
Citation	2
