

Effect of Initial Substrate pH and Light Intensity on Biohydrogen Production through photo-fermentation from Palm Oil Mill Effluent (POME)

Title	Effect of Initial Substrate pH and Light Intensity on Biohydrogen Production through photo-fermentation from Palm Oil Mill Effluent (POME)
Abstract	
Authors	F Furqon, YA Purwanto, RPA Setiawan, B Susilo
Journal Name	Journal of Renewable Energy and Environment 11 (3), 100-108, 2024
Publish Year	2024
Citation	(not set)
