

Quantum simulations of preferable H₂O dissociation pathway on the ru-alloyed Pt(111) surface based on density functional theory

Publication Name	Key Engineering Materials
Quartile	4
Creator	Victor R.
Page	495-500
Issn	10139826
Volume	840 KEM
Cover Date	2020-01-01
Cover Display Date	1 January 2020
Doi	
Citedby Count	3
Aggregation Type	Book Series
