| <b>Abstract</b>     | Gross <i>Anguilla</i> is one of economic commodity where have demand and price increase every year but not balance with stocking in the nature. Decreasing population was report in Japan, America, Europe including Indonesia which reported in the Central Sulawesi and Central Java water. One the effort to recover the population in the nature is by restocking. <i>Anguilla</i> restocking can be success if the fish used have high survival rate. Good performance of seed which can be obtained by stunting. |
